DETAILED ACTION

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The cited art taken either singly or in combination with other prior arts fails to anticipate or fairly suggest the limitations which the Applicant claims in independent claim 1 in a manner which would warrant a rejection under 35 U.S.C. § 102 or 35 U.S.C. § 103, especially when these limitations are considered within the specific combination claimed.

The cited art, U.S. Pat. No. 6,399,432 to Zheng et al., discloses a process to control poly silicon profiles in a dual doped poly silicon process. Zheng et al., however, fails to anticipate or fairly suggest at least, among other, the method steps of: *forming a first locally doped semiconductor region of a first conductivity type and a second locally doped semi-conductor region of a second conductivity type over an undoped, lower semiconductor region; implementing a first etch to simultaneously create a desired pattern in the first and second locally doped semiconductor regions in a manner that also provides a first passivation of exposed sidewalls of the first and second locally doped semiconductor regions, wherein the first etch removes material from the first and second locally doped semiconductor regions at a substantially constant rate with respect to one another, and in a substantially anisotropic manner; and implementing a second etch to complete the desired pattern in the undoped, lower semiconductor region in a manner that protects the first and second locally doped semiconductor regions from additional material removal therefrom*, as recited in claims 1 and 11.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
